Subject: RE: NICO Exploration property water license renewal

Hello Rick,

The NSMA does not object to renewal of the care and maintenance licence, but would point out that we should be noted on the "other affected persons or properties" section. We do continue to assert that this project is on our land, using our water... etc.

By now, Sheryl should have received the hard copy of the water license renewal application for the NICO exploration project. An electronic copy is attached to this e-mail. I call it the exploration project because this has nothing to do with the current applications Fortune has in place for the development of the mine. As I mentioned in our meeting on November 18th, 2011, the NICO site is now in a state of care and maintenance. No further exploration work is being proposed at this time. The site will be monitored on a regular basis and the only other activities being proposed are day-long site visits for First Nations and regulators on an as needed basis.

Our current water license for this property expires next month which is why you're seeing this application now. Once you have had a look at the application, I would appreciate any feedback you may have. Jim Mucklow or I would be happy to answer any questions you may have concerning this water license renewal. If you're satisfied with the contents of the application, an e-mail

stating that would be appreciated.

Rick
