Date: December-21-11 1:01:21 PM

Good afternoon Brett,

The Tlicho Government is aware of Fortune Minerals application for renewal of the water licence. We understand that though the mine is in care and maintenance, there is still a need to monitor water quality at the site. We do not have any major concerns with this application at this time.

Happy Holidays!

Kerri

Good morning,

I just want to confirm that you are aware of Fortune's application for a renewal to their existing water licence W2006L2-0002. This licence basically requires Fortune to monitor water quality in discharges from the underground portal and to ensure licenced water quality criteria are met; it is not related to the proposed mine development that is currently undergoing Environmental Assessment.

The WLWB has received Fortune's Water Licence Renewal application, but will not deem it complete and initiate the review process until we receive confirmation that the Tlicho Government has been notified and does not have any major concerns. As always, the Tlicho Government will have another opportunity to provide input to the WLWB during the review process after the application is deemed complete.

Masi,
Brett
